Ping An Bank Co., Ltd.

2018 First Quarterly Report

Section I. Important Notes

- 1.1 The board of directors (hereinafter referred to as the "Board"), the supervisory committee, the directors, the supervisors and senior management of the Bank guarantee the authenticity, accuracy and completeness of the contents of the 2018 First Quarterly Report, in which there are no false representations, misleading statements or material omissions, and are severally and jointly liable for its contents.
- 1.2 The 16th meeting of the 10th session of the Board of the Bank deliberated the 2018 First Quarterly Report. The meeting required 14 directors to attend, and 12 directors attended the meeting. The directors Ip So Lan and Cai Fangfang did not attend the meeting for business affairs and they entrusted another two directors Yao Jason Bo and Tan Sin Yin to exercise their voting rights respectively. This 2018 First Quarterly Report was approved unanimously at the meeting.
- 1.3 Xie Yonglin (the Bank's Chairman), Hu Yuefei (the President), and Xiang Youzhi (the CFO/the head of the Accounting Department) guarantee the authenticity, accuracy and completeness of the financial report contained in the 2018 First Quarterly Report.
- 1.4 Reminder on non-standard audit opinions \Box Applicable \sqrt{Not} applicable

This quarterly financial report has not been audited; PricewaterhouseCoopers Zhong Tian LLP conducted agreed-upon procedures on selected items and the preparation process of the financial statements of the Report.

Section II. Corporate Profile

I. Key Accounting Results and Financial Indicators

Whether the Bank needs to make retrospective adjustments to or restate prior-year accounting figures?

| gains/losses) (un-annualized) | 2.77% | 2.89% | point |
| Weighted average return on net assets (net of non-recurring | | | -0.54 percentage |
| weighted average return on het assets (het of hon-recurning | | | -0.54 percentage |

Note: (1) On 7 March 2016, the Bank issued non-cumulative preference shares of RMB20 billion in a non-public way. In calculating the "EPS" and "weighted average return on net assets", numerators were net of the aforementioned dividends on preference shares paid.

(2) The Bank started to implement the provisions of Accounting Standard for Business Enterprises No. 16 - Government Grants in June 2017, and separately included "other income" in "operating income" on the income statement. The Bank complied with provisions related to presentation in Accounting Standard for Business Enterprises No. 42 -Non-current Assets or Disposal Groups Held for Sale and Discontinued Operations and Circular on Amendment to Formats of Financial Statements of General Industry in the 2017 Annual Report, and separately included "gains/losses on disposal of assets" in "operating income" on the income statement. The comparatives for "operating income" for Q1 2017 have been accordingly restated to RMB27,726 million from RMB27,712 million.

II. Description of Significant Events and their Progress, Impact and Solutions

 $\sqrt{\text{Applicable}}$ $\Box \text{Not applicable}$

On 14 August 2017, the 2017 first extraordinary general meeting of the Bank deliberated and approved the *Proposal of Ping An Bank Co., Ltd. on the Solution of Public Issuance and Listing of A-share Convertible Corporate Bonds*, for the Bank's proposed public issuance of no more than RMB26 billion of A-share convertible corporate bonds (hereinafter referred to as "the Issuance").

On 26 March 2018, the Bank received the *Reply of CBRC on Issues Concerning the Public Issuance of A-share Convertible Corporate Bonds of Ping An Bank* (Yin Jian Fu [2018] No. 71). CBRC agreed that the Bank can publicly issue A-share convertible corporate bonds of no more than RMB26 billion, which will be included in the core tier one capital of the Bank in accordance with relevant regulatory requirements after the conversion. The issuance is subject to the approval by CBRC before it is implemented, and the program ultimately approved by the aforementioned regulatory authority shall prevail.

For details, please refer to announcements released by the Bank in *China Securities Journal, Securities Times, Shanghai Securities News, Securities Daily* and on CNINFO (www.cninfo.com.cn) on 15 August 2017 and 27 March 2018.

X. Management Discussion and Analysis

(I) Description of overall operations

The year 2018 is the 40th anniversary of China's reform and opening up, the first year for the Bank to implement the guiding principles from the 19th CPC National Congress in their daily activities, and a crucial year for ensuring the successful building of a moderately well-off society and furthering the 13th Five-Year Plan. In March 2018, the successful convening of the NPC & CPPCC marked a huge progress in CPC and State Council's institutional reforms, laying a solid foundation for safeguarding the long-term development of the country. The financial supervision reform had been further deepened, providing an important guide for the banking industry to comprehensively prevent and control financial risks and deliver high-quality services in support of the real economy. In Q1 2018, China's overall economy has been trending up steadily as the "Belt and Road" initiatives continue to make solid advances and the supply-side structural reform continues to deepen, and China has further boosted its capability for powering its economic development.

In compliance with the national strategy and economic and financial trends and under the guidance of transformation strategy to "be technology-driven, pursue breakthroughs in retail banking, and reinvent its corporate banking", the Bank continues to strengthen its efforts in scientific and technological innovation and technology applications, to promote the transformation of intelligent retail banking and the transformation of corporate banking business from scale-driven inorganic growth to value- and quality-driven organic growth. In addition, the Bank continues to make solid efforts to prevent and mitigate all types of financial risks, actively explore opportunities and solutions, and heighten its overall capability to serve the real economy. Accordingly, various business lines have maintained solid growth, asset quality remained stable, and the strategic transformation has become more fruitful in delivering concrete results.

1. Robust business development

In Q1 2018, the Bank recorded an operating income of RMB28,026 million, representing a year-on-year increase of 1.1%, including net non-interest income of RMB9,339 million, a year-on-year increase of 5.4%, mainly due to the increase in fee and commission income from credit card business. The net non-interest income accounted for 33.3%, up 1.4 percentage points year on year. The Bank's profitability remained stable, with an operating profit before the provision of RMB19,255 million, down 6.9% year on year, and a net profit of RMB6,595 million, up 6.1% year on year.

As at the end of March 2018, the Bank's total assets amounted to RMB3,338,572 million, up 2.8% over the end of last year. The balance of deposits due to customers was RMB2,034.494 million, an increase of 1.7% over the end of last year. The total loans and advances to customers (including discounted bills) reached RMB1,772,528 million, representing an increase of 4.0% as compared with the end of last year, of which personal loans (including credit cards) increased by 2.6 percentage points to 52.4% over the end of last year. As at the end of March 2018, the balance of principal-guaranteed wealth management products (WMPs) (including structural deposits) across the Bank was RMB439,426 million, up 26.7% compared with the end of last year; the balance of non-principal-guaranteed WMPs was RMB493,095 million, down 1.6% compared with the end of last year.

2. Greater progress in retail banking transformation

The Bank adhered to the principle to "be technology-driven" to promote the rapid integration of its online and offline operations and innovation in retail banking and the Internet-based activities. Meanwhile, the Bank continued to deepen its comprehensive financial advantages to achieve sustained, stable and rapid business growth.

(1) Rapid growth in scale and performance

As at the end of March 2018, assets under management (AUM) of retail customers of the Bank amounted to RMB1,186,386 million, up 9.2% over the end of last year; the number of retail customers (including the users of its debit cards and credit cards) increased 73,625.7 thousand, up 5.3% over the end of last year, including private wealth customers and qualified private banking customers of 495.5 thousand and 25 thousand respectively, representing a growth of 8.5% and 6.4% over the end of last year respectively; the current credit card accounts reached 42,260 thousand, an increase of 10.2% over the end of last year. The balance of retail deposits was RMB386,529 million, an increase of 13.4% over the end of last year, and the balance of retail loans (including credit cards) was RMB928,682 million, an increase of 9.4% over the end of last year; the transaction volume of credit cards amounted to RMB559,445 million, rising by 85.2% year on year. The number of monthly active users of Ping An Pocket Bank APP was 16,048 thousand, one of the largest among joint-stock banks.

(2) Stable asset quality at historically good level

As at the end of March 2018, the non-performing ratio of the Bank's retail business remained stable with a slight decline. The non-performing ratio of retail loans (excluding credit cards) was 1.01%, down 0.17 percentage point from the end of last year, and with credit cards and personal operating loans excluded, the non-performing ratio was 0.30%, down 0.05 percentage point from the end of last year. Non-performing ratio of credit cards was 1.14%, down 0.04 percentage point from the end of last year, as the asset quality remained stable. The proportion of major retail loan products (New Generation Loans and auto loans) that had migrated from not being overdue to being overdue for over 30 days remained at a historically low level. Since the second half of 2017, in response to changes in internal and external environment, the Bank adopted proactive and flexible risk control strategies for different customer groups, to improve profits and maintain a stable and manageable risk profile. In terms of enhancing risk management capabilities, the Bank launched the AI+ risk control project to achieve control over total credit line for credit products, overall automatic auditing, and accurate decision-making within seconds by establishing a unified risk information platform. In the meantime, anti-fraud for debit cards and credit cards was managed in a unified manner to build an anti-fraud defense line for large-size retail enterprises.

(3) Stable and rapid growth of core businesses

The credit card business experienced rapid and stable growth. In Q1 2018, the number of new credit cards issued by the Bank reached 4.762 million, up 139.6% year-on-year. At the end of March 2018, the balance of credit card loans was RMB348,240 million, an increase of 14.7% from the beginning of the year. The Bank enriched its credit card product system, deepened cross-border integration, and provided customers with diversified, multi-scenario, convenient and efficient card use requirements. In cooperation with Shanda Games in February 2018, the Bank launched Ping An Final Fantasy XIV series exclusive co-branded credit cards, as it continued to enrich Ping An UNI Card offerings to provide more personalized options for young customer groups; in March 2018, the Bank joined hands with Manchester United Football Club to launch Ping An Manchester United Red Devil Platinum Credit Cards and created a brand-new cross-border financial service experience for fans. In the same month, in cooperation with Tencent Video, the Bank launched Ping An Tencent Video VIP Co-brand Credit Card to provide member users with a credit card combining both a financial service function and Tencent video member preferential rights. At the same time, relying on the integrated and upgraded new Pocket APP, the Bank continuously improved its one-stop integrated financial service platform, offering a one-click credit card that instantly connects basic financial services with real-life scenarios, and continued to create the ultimate customer experience that is "fast, easy and great".

In O1 2018, New Generation Loans newly issued by the Bank amounted RMB28.456 billion with a quarter-end balance of RMB138.007 billion and an NPL ratio to 0.60%. In order to support inclusive finance, ease the financing difficulties of small and micro enterprises, better serve the development of the real economy, and effectively promote financial resources in real economy instead of fictitious economy, New Generation Loans actively supported small and micro business owners, individual industrial and commercial customers, and other customers. It solved the long-term financing difficulties of this type of customer group in the business process, increased support for small and micro enterprises, and promoted the healthy and sustainable development of individual loan business. At the same time, drawing on Internet and big data technologies, it actively expanded its Internet channels and traffic portals, focused on increasing the entrance of scenarios, expanded the coverage of customers, enhanced customer retention, achieved online and offline interaction, and continuously improved the accuracy of customer acquisition, so that its banking services could benefit more customer groups. The Bank continued to build its one-stop business and consumer loan platform through Internet channels such as online banking, mobile banking, WeChat, and portals, made full use of Internet technology to enhance product competitiveness, achieve centralized, automated and intelligent business application processing, continuously optimized business processes and improved customer experience and service efficiency.

In Q1 2018, the Bank's auto finance loans amounted to RMB36.474 billion, an increase of 67.0% year-on-year; at the end of March 2018, the Bank's auto loan balance was RMB138.868 billion, an increase of 6.4% from the end of the previous year, and it continued to maintain its leading position in market share. By means of innovation in products, optimization of the credit process and application of the scientific risk qualification model as well as the big data strategy, the Bank enabled more than 67% of credit reviews and approvals to be automatically completed through its auto finance business system, including over 50% of the credit reviews and approvals for second-hand car business, thus rendering better customer experience and establishing a leading edge in the industry. The Bank continued to strengthen its channel innovation and service innovation, and provided customers with more efficient, and convenient business application

methods through online channels, such as mobile phone Pocket Bank, WeChat, and websites, to effectively improve customer experience and satisfaction.

Leveraging cross-selling of retail business, according to which credit cards were issued to groups and insurance was sold by the Bank, the performance of the Bank's comprehensive finance business kept growing. In Q1 2018, the number of new migration customers on the cross-selling channels was 1,110.5 thousand, accounting for 47.8% of the new retail customers(excluding credit cards), of which, the number of customers with wealth assets and above (private financial customers) increased by 14 thousand, accounting for 35.9% of the overall new private financial customers, and the balance of assets under management (AUM) of retail customers; New Generation Loan granted by cross-selling channels amounted to RMB11,181 million, with the proportion of overall issuance of New Generation Loan through cross-selling channels accounting for 39.3%; auto finance loans amounted to RMB6,796 million, with the proportion of overall issuance of auto finance loans accounting for 18.6%. Credit cards issued through cross-selling channels accounted for 38.6% of the total number of newly granted cards. The total net non-interest income from group insurance sold by all retail channels on a commission basis was RMB621 million, a year-on-year increase of 67.5%.

In Q1 2018, the Bank proactively expanded customer acquisition through its group resource platform. On the one hand, we continued to work hand in hand with Ping An Life Insurance to build a club platform targeting life insurance elites and channel access to high-net-worth customers. The scale of club assets continued to grow steadily after breaking through the 100 billion mark; on the other hand, we explored new business models, and worked together to create a closed-loop operating system for "Private Diamond Customer Group Technology + Finance + Health" with Ping An Securities and Ping An Doctor. At the same time, the Bank optimized the rights and benefits to its private diamond customers, pioneered the concept of "health account" services to cover the entire customer group, created a "finance + health" service system, and used an intelligent service platform to promote customer value enhancement.

(4) Closer integration between technology and business

Since the official opening of Guangzhou Liuhua Branch on 29 August 2017, the Bank's first pure retail new store, 21 new stores had been opened in succession and 11 stores were under preparation as at the end of March 2018. While the infrastructure of the outlets continued to improve, the customer operating and self-service platforms at the outlets were also rapidly upgraded. The two-week iterative process and the real-time data system were basically completed. OMO (ONLINE MERGE OFFLINE) is an online and offline tool that integrates online communication through Pocket Bank to enable customers to communicate online with financial managers who manage their accounts in real time. Financial managers conduct customer service in real time and directly provide online consulting services, or engage customers offline to offer more extensive services. The implementation of the end-to-end operation management scenario for branches took place rapidly in a closed loop and the AI application tool was gradually expanded and optimized. The launch of the AI view of the customer enables the financial managers to further understand their customers, integrate customer labels, use models to calculate customers' value and risk level, and maximize customer development opportunities, and increase customer touchpoints.

In Q1 2018, being responsible for the sales promotion of professional product lines at the outlets through the online and offline linkage method, the Bank continued to optimize the long-range investment consulting platform, realized the expansion of the portfolio product line, and optimized the combination of bank financing and public funds. It had become the first intelligent investment consulting bank to put bank financing products into the recommended portfolios; at the same time, one-click optimization configuration was enabled, and customers could complete asset allocation in one click according to wealth diagnosis results.

The Bank strived to develop Ping An Pocket Bank APP into a one-stop comprehensive financial mobile service platform. At the end of March 2018, the APP accumulated 46.727 million subscribers and APP monthly live subscribers reached 16.048 million. Ping An Pocket Bank continued to adopt the agile development model, continuously optimized it by means of rapid version iterations, and continuously enriched product functions. In Q1 2018, the Bank launched wealth diagnosis function to develop a comprehensive understanding of a customer's risk tolerance and current asset mix and structure and guide the customer to optimize his asset mix and structure, including advice on products that match his risk profile and access to top products within the customer's acceptable risk limits, to help the customer more easily achieve wealth appreciation; and completed Smart RITIANLI Product upgrade, and immediately gained interest once purchasing T+0. It also supported various scenarios including transfer, repayment, online payment, daily-life payment, POS consumption, ATM withdrawals and purchase of wealth

management products to provide customers with more perfect services. The Bank started the cross-bank scanning code withdrawal function to support scanning code withdrawals at other ATMs, and provided more convenient service support for customers' offline withdrawals. The Bank integrated credit card malls and merchants service to Pocket Bank for one-stop search to provide users with a more convenient search experience. It upgraded transfer function to support other banks' card transfer to other bank accounts, broke banks' inherent transfer restrictions, and truly met users' all-dimensional transfer requirements.

3. Greater specialization in corporate banking

In Q1 2018, in the face of external situation of strong supervision and deleveraging, and the continuous in-depth strategic transformation in the industry, the Bank continued to drive the transformation course of becoming more industry-specific, specialized, investment-banking-oriented, and lighter in capital and assets, establishing a new normal for reinventing corporate banking.

The business was transformed into a light-weight model. The scale of assets and liabilities remained stable, and the structural adjustment was emphatically promoted. Liability business was transferred from credit extension to active liabilities and "Platform + Product + Service" settlement. Asset operations accelerated the revitalization of existing assets and the distribution of incremental assets. Asset rotation was speeded up by means of assets being derecognized, to explore a new momentum for the growth in the number of customers and that in liabilities. The team was turning to be more industry-specific and specialized. By means of secondary reconstruction, the corporate banking team had established a professional franchise team and was dedicated to building a professional and standardized elite force, to focus on reinventing and deepening businesses in key industries. Sales model transformation from individual combat operations to group operations: actively embrace the Group's comprehensive finance, comprehensively promote the transformation of the marketing model, make full use of the Group's channels, rely on on-line channels to sell standardized products that are simple, focused, and best-selling, and rely on off-line account managers and product managers to build agile teams to collaboratively market complex products.

In order to effectively improve the return on capital, in Q1 2018, the Bank cut down on the high-consumption low-return businesses and customers. At the end of March 2018, the balance of corporate loans decreased to RMB843.8 billion by RMB 11.4 billion over the end of last year, the balance of corporate off-balance-sheet business (including bank acceptance notes, letter of credit and letter of guarantee) decreased to RMB333.1 billion by RMB22.3 billion over the end of last year, the balance of corporate risk-weighted assets decreased to RMB821.3 billion by RMB29.7 billion over the end of last year, and the balance of interbank risk-weighted assets decreased to RMB347.4 billion by RMB26.4 billion over the end of last year.

(1) Focus on business development through dedicated efforts and specialization

Carefully cultivating the target markets

In Q1 2018, the Bank focused on the top ten industries in terms of scale, weak cycles, and growth potentials (including health care, real estate, electronic information, transportation, warehousing and logistics, environmental protection, clean energy, infrastructure, culture and education and people's livelihood) and government customers, and actively employed "Commercial bank + Investment bank + Investment" industrial financial model to support the development of real economy and used "Platform+Product+Service" model to provide supporting services for government finance. Meanwhile, five major industry divisions (electronics information, health care, transportation, real estate and energy) and government finance division (in preparation) were responsible for undertaking customer marketing and service functions.

At the end of March 2018, the total deposit balance of those industry divisions amounted to RMB157,994 million, the balance of assets under management amounted to RMB451,312 million, operating income reached RMB1,833 million, and deposit balance of government customers totalled RMB285,445 million, up 9.1% from the beginning of the year.

Perfecting the "light-asset and light-capital" model

Focusing on the "more industry-specific, specialized, investment-banking-oriented, and lighter in capital and assets" strategic objectives, in 2018, the Bank will put efforts into converting the traditional business model of on-balance sheet and off-balance sheet credit grants into an investment bank model of "contracting, undertaking, and underwriting". Concentrated on the "Commercial bank + Investment bank" model, the Bank will accomplish four core projects: 1) joint hands with Ping An Securities, to deepen the bank-security strategic cooperation; 2) develop the "Investment Bank + Private Bank" model, to enhance the ability of customized investment bank services; 3) focus on investment bank business of the "top ten industries + government customers"; 4) expand social capital and develop matchmaking trading.

In Q1 2018, the four major businesses of real investment bank, bonds underwriting, matchmaking trading,

equity investment, and strategic cooperation between bank and security, were all in place and began to enter the growth track. The Bank's total amount of bond underwriting reached RMB50,730 million, maintaining a good momentum, and its market share increased from 2.65% at the end of the previous year to 4.37%. The net value of custody business was RMB6.22 trillion, an increase of 1.5% from the end of the previous year. The self-operated and agency trading volume of precious metal business was in the front rank of joint-stock banks. In Q1 2018, the newly opened Ping An Gold accounts reached 550,000.

Improving precision and effectiveness in risk management and control

The Bank carried on to strengthen the comprehensive risk management system, strictly implemented risk policies for new credit extensions, and carried out special recovery for existing non-performing assets, so as to increase efficiency and reduce pressure for corporate business.

The Bank's Special Asset Management Division actively implemented the concept of operation and "light assets and light capital", innovated the recovery and disposal model for non-performing assets, and established a three-tiered linkage of team, region and headquarters. Meanwhile, the Bank leveraged big data and mobile applications to build a special asset management system (AMS). Through the system, the closed management for the process of disposal of special corporate banking assets was realized, and the pace of intelligent recovery was accelerated. In Q1 2018, the division recovered non-performing assets of RMB 6,605 million, an increase of 295.0% on a year-on-year basis.

(2) Building an intelligent platform through technological innovations

In terms of platform strategy, the Bank continued to promote optimization, upgrade and smart transformation of business platforms with the help of science and technology, and further improved product and service capabilities to enhance customer experience.

1. Baoliyun platform was upgraded to SAS platform. Through the innovation of service models, risk control methods and the application of financial technology, the Bank continued to optimize the functions of the platform and created a one-stop assets receivable service system including settlement, financing, asset management, matchmaking trading and risk control. At the end of March 2018, the platform had factoring agents and upstream and downstream buyers and sellers totalling 6,916, and the cumulative business volume reached RMB19,663 million.

2. The construction and marketing promotion of cross-border E2.0 platform were accelerated. The Bank continuously enriched service scenarios, expanded service extensions, built an "Internet + foreign trade" ecosystem driven by platform services, to provide an one-stop cross-border integrated financial services for customers, and by virtue of platform finance model, drove cross-border business with "light assets and light capital" transition and rapid growth. In Q1 2018, the accumulative on-line transaction scale of the platform reached RMB138,930 million, up 42.3% year-on-year.

3. The Bank actively promoted the construction of service platform for small and medium-size enterprises (SMEs). The platform focused on "1 App + 1 account + 1 set of service system", to achieve centralized operation. With the help of data mining, artificial intelligence, and risk control models, the Bank completed the development of its Know Your Business (KYB) model, to provide SMEs with on-line, batch and intelligent payment settlement, wealth management, value-added services and financing services.

4. The Bank continuously boosted the impact of Orange E Net and Hang-E-Tong. In Q1 2018, "Orange E-Net" had provided services for 986 e-commerce platforms in the industry, an increase of 29 from the end of the previous year, and continuously exported the Bank's industry standards for financial systems of digital supply chain. The first mover advantages had been further consolidated. The customer coverage of "Hang-E-Tong", a comprehensive financial asset trading platform, continued to expand. The platform cumulatively had 1,996 customers, an increase of 67 over the end of the previous year, with a clear agglomeration effect among peers.

(3) Comprehensive finance

Actively leveraging the Group's comprehensive finance platform and new sales model of group comprehensive finance, the Bank addressed the four major matters including marketing skill, revenue, collaboration and information, provided rich financial products and services for customers in a more efficient way and enhanced customer stickiness as well. In Q1 2018, 50 new investment projects recommended by the Bank for the Group's internal investments were launched, for which RMB40 billion was invested. Products under custody of the Bank provided by subsidiaries within the Group amounted to RMB2.23 trillion, accounting for 35.9% of the overall custody scale.

4. Stable asset quality with improvements

The Bank proactively coped with external risks and adjusted its business structure by increasing loans granted to retail business with better asset quality and pursuing continuous excellence in corporate business. Meanwhile, the Bank implemented strict control of incremental business risk, and conducted comprehensive investigation of existing loans to solve problems in an orderly way.

In Q1 2018, the bank's provision for asset impairment losses was RMB10,671 million, a year-on-year decrease of 14.2%, of which the provision for impairment losses on loans was RMB10,226 million; at the end of March 2018, the balance of provision for loan impairment was RMB51,428 million, up 17.4% from the end of the previous year; the provision-to-loan ratio was 2.90%, an increase of 0.33 percentage point

over the end of the previous year; the provision coverage ratio was 172.65%, an increase of 21.57 percentage points over the end of the previous year; the non-performing loan ratio was 1.68%, a decrease of 0.02 percentage point, slightly lower over the end of the previous year. In Q1 2018, the Bank recovered non-performing assets amounting to RMB7,512 million, a year-on-year increase of 213.8%, of which credit assets (loan principal) were RMB7,013 million; of the recovered loan principals, loans of RMB4,082 million had been written off, and non-performing loans of RMB2,931 million had not been written off; more than 94.7% of the recovered amount of non-performing assets was recovered in cash and the rest was recovered in kind.

5. Robust network building

The Bank continued to improve the smart banking capability of its network outlets and improve the overall distribution of its network presence. By the end of March 2018, the Bank had 70 branches and a total of 1,066 business locations.

(II) Asset Quality

1. Five-tier classification of loans and advances to customers

Note: "Others" included consumer loans of New Generation Loans, licensed mortgage loans, small consumer loans and other guaranteed or pledged consumer loans.

(1) The increase in non-performing ratio of corporate loans was mainly affected by the external financial and economic trends. Some of the Bank's customers including private small and medium-sized enterprises and low-end manufacturing enterprises were facing problems such as difficulties in management and declining financing capability, which led to distressed and broken fund chains, inability to repay loans and so on.

(2) The Bank strengthened the construction of collection and recovery team, actively adopted a variety of resolutions for loan collection and recovery, and continued to increase the disposal of non-performing assets. As a result, the overall asset quality of personal loans remained stable and controllable, and the non-performing ratio of personal loans slightly declined as compared with that at the beginning of the year: The Bank further adjusted the customer structure of housing mortgage loans, strengthened efforts for high-quality customers and effectively improved the quality of new loans. As a result, the non-performing ratio of mortgage loans maintained at a low level.

The Bank actively adjusted the stock business structure of operating loans by withdrawing the credit loans or transforming them by means of credit enhancement. While ensuring risk control of stock business, the Bank improved availability of real estate mortgage business and strictly controlled new business risk to ensure the asset quality of operating loans within the controllable range.

The Bank introduced big data analysis into auto finance loan business, continuously improved access threshold standard, and increased the automated approval rate. At the same time, advanced technologies such as micro-expression and voiceprint were introduced to further strengthen the ability of risk control. For collection and recovery, the Bank enhanced the network of the collection management team by refined work division. Meanwhile, the Bank implemented APP on-line work for all the collection work to enormously improve the productivity of management and recovery, and to maintain stable quality of overall assets while ensuring compliance with regulations.

(3) The Bank had implemented whole-process risk management concept for credit card business, made full use of quantitative tools and effectively managed and controlled risks. On the one hand, the risk management strategy was fully optimized through the scientific tolls such as big data and the application scoring model, which could effectively improve the structure and quality of the new costumers and optimize the stock structure to ensure the sustainable development of the asset portfolios. On the other hand, while reducing the new non-performing loans, the Bank has effectively improved the collecting ability by optimizing the collection strategy and improving the collection management ability for non-performing assets.

3. Overdue loans

| | | | (11) | \mathbf{K} |
|--|---------|---------------|---------|---|
| | 31 N | 31 March 2018 | | cember 2017 |
| | | Proportion to | | Proportion to |
| Item | Balance | total loans | Balance | total loans |
| Loans with principal and interest overdue for less | | | | |
| than 90 days | 16,682 | 0.94% | 17,284 | 1.01% |
| Loans with principal and interest overdue for more | | | | |
| than 90 days | 39,637 | 2.24% | 41,460 | 2.43% |

(In DMD million)

The Bank's loans that were overdue for less than 90 days (loans with principal not overdue but interest overdue for less than 90 days inclusive) amounted to RMB16.682 billion, down 3.5% as compared with the end of last year; the balance of loans that were overdue for more than 90 days (loans with principal not overdue but interest overdue for over 90 days inclusive) was RMB39.637 billion, down 4.4% as compared with the end of last year. The balance and proportion of loans overdue for more than 90 days both decreased as compared with the end of last year.

(III) Interest Income and Expense

1. Average daily balance and average yield/cost rate of major asset and liability items

| | | | - | | (In RM | B million) |
|---------------------------|-----------|-------------|-----------|-----------|-------------|------------|
| | Ja | n Mar. 2018 | 3 | Ja | n Mar. 2017 | 1 |

| Bills discounting and | | | | | | |
| interbank business | 694,339 | 7,451 | 4.35% | 783,296 | 7,488 | 3.88% |
| Others | 147,039 | 1,414 | 3.90% | 81,322 | 852 | 4.25% |
| Total interest-earning | | | | | | |
| assets | 3,362,186 | 40,944 | 4.94% | 3,029,722 | 35,045 | 4.69% |
| Liabilities | | | | | | |
| Due to customers | 2,017,494 | 11,512 | 2.31% | 1,890,834 | 8,427 | 1.81% |
| Bonds issued | 344,088 | 4,047 | 4.77% | 347,720 | 3,243 | 3.78% |
| Including: Interbank | | | | | | |
| deposits | 298,972 | 3,461 | 4.69% | 317,605 | 2,812 | 3.59% |
| Interbank business and | | | | | | |
| others | 762,700 | 6,698 | 3.56% | 584,962 | 4,506 | 3.12% |
| Total interest-bearing | | | | | | |
| liabilities | 3,124,282 | 22,257 | 2.89% | 2,823,516 | 16,176 | 2.32% |
| Net interest income | | 18,687 | | | 18,869 | |
| Deposit-loan spread | | | 3.84% | | | 4.25% |
| Net interest spread (NIS) | | | 2.05% | | | 2.37% |
| Net interest margin (NIM) | | | 2.25% | | | 2.53% |

The Bank continued to optimize its business structure. The amount and proportion of personal loans increased, which resulted in a slight increase in the yield rate of interest-earning assets over the same period of last year; at the same time, due to increase in interbank market interest rates in Q1 2018, the average cost rate of interest-bearing liabilities increased year on year by a greater extent than the yield rate of interest-earning assets, and the deposit-loan spread, NIS and NIM decreased correspondingly.

| | Ja | an Mar. 201 | 8 | 0 | Oct Dec. 201 | .7 |

XI. Capital Adequacy Ratio, Leverage Ratio and Liquidity Coverage Ratio

(I) Capital Adequacy Ratio

| | | (In RMB million) |
|--|---------------|------------------|
| Item | 31 March 2018 | 31 December 2017 |
| Net core tier one capital | 183,280 | 184,340 |
| Other tier one capital | 19,953 | 19,953 |
| Net tier one capital | 203,233 | 204,293 |
| Tier two capital | 51,756 | 44,934 |
| Net capital | 254,989 | 249,227 |
| Total risk-weighted assets | 2,237,330 | 2,226,112 |
| Credit risk-weighted assets | 2,015,493 | 2,000,758 |
| On-balance-sheet risk-weighted assets | 1,838,412 | 1,820,051 |
| Off-balance-sheet risk-weighted assets | 172,215 | 176,352 |
| Risk-weighted assets of counterparty credit risk | | |
| exposure | 4,866 | 4,355 |
| Market risk-weighted assets | 28,128 | 31,645 |
| Operational risk-weighted assets | 193,709 | 193,709 |
| Core tier one capital adequacy ratio | 8.19% | 8.28% |
| Tier one capital adequacy ratio | 9.08% | 9.18% |
| Capital adequacy ratio | 11.40% | 11.20% |

(II) Leverage Ratio

(In RMB million)

| | | | (| |
|---|-----------|-------------|--------------|-----------|
| | 31 March | 31 December | 30 September | 30 June |
| Item | 2018 | 2017 | 2017 | 2017 |
| Leverage ratio | 5.56% | 5.69% | 5.75% | 5.62% |
| Net tier one capital | 203,233 | 204,293 | 202,716 | 196,648 |
| Balance of on- and off-balance sheet assets | | | | |
| after adjustment | 3,655,792 | 3,592,511 | 3,526,424 | 3,501,389 |

Note: It was mainly due to the increase in the balance of on- and off-balance sheet assets after adjustment. The leverage ratio at the end of the reporting period decreased as compared to that at last year-end.

(III) Liquidity Coverage Ratio

| | | (In RMB million) |
|--------------------------|---------------|------------------|
| Item | 31 March 2018 | 31 December 2017 |
| Liquidity coverage ratio | 108.89% | 98.35% |
| Qualified current assets | 264,548 | 317,833 |
| Net cash outflow | 242,956 | 323,154 |

Note: Pursuant to the requirements of the *Administrative Measures for Liquidity Risks of Commercial Banks (for Trial Implementation)*, the liquidity coverage ratio of commercial banks shall reach 100% by the end of 2018; during the transitional period, the liquidity coverage ratio shall reach 90% by the end of 2017.

Section IV. Financial Statements

I. Financial Statements

(I) Balance Sheet (not audited)

- (II) Income Statement (not audited)
- (III) Cash Flow Statement (not audited)

The Bank adopted four revised accounting standards "Accounting Standard for Business Enterprises No. 22 - Recognition and measurement of financial instruments", "Accounting Standard for Business Enterprises No. 23 - Transfer of financial assets", "Accounting Standard for Business Enterprises No. 24 - Hedge Accounting", and "Accounting Standard for Business Enterprises No. 37 - Presentation of financial instruments" (hereafter referred as the "new accounting standards for financial instruments" or the "new standards") issued by MOF on 1 January 2018. The Bank disclosed the primary content of the new accounting standards for financial instruments and the effect of changes in accounting policies in Note IX to the financial statements "EVENTS AFTER THE BALANCE SHEET DATE - Implementation implications of the new accounting standards for financial instruments. The difference/adjustments between new accounting standards for financial instruments. The difference/adjustments between new accounting standards for financial instruments and the original accounting standard will be transferred to retained profits at the beginning of the period or other comprehensive income. The Bank has disclosed the balance sheet after the initial implementation of new standards dated 1 January 2018 in the accompanying financial statements of the quarterly report.
